

# St. Joseph's

Catholic Secondary School  
Learn. Live. Lead

## Learn:

At St. Joseph's our focus is on academics. We at St. Joseph's believe that we have one of the best academic schools in Eastern Ontario. With dedicated, caring and highly qualified teachers we will ensure that you will be well prepared for university, college or the world of work. We offer a wide range of compulsory and optional courses from transportation technology to physics. Our Religion program will help you to learn about your faith, to learn about current world issues and to examine other world religions. St. Joseph's Secondary School will provide you with a learning environment second to none!

## Live:

In addition to academics, St. Joseph's will provide you with a wide range of extra-curricular activities to make your experience at our school interesting and enjoyable. We encourage all students to get involved in the various activities provided for you by the school. Whether you like acting, painting or playing competitive sports, St. Joe's has numerous clubs and sports teams to keep you active and involved. Two of the newest additions to our athletic program that we are proud of are our girls' hockey team and our boys' football team. Get involved and enjoy your time with us.

In addition to extra-curricular and sports activities, as a Catholic community we encourage all students to live their faith by taking part in all of our liturgical celebrations throughout the year and by taking part in our various outreach activities and our youth group.

## Lead:

At St. Joseph's Secondary School we encourage our students to get involved in their school and local community and to lead by example. We are proud of the many students who have gone on to lead in many communities both in Canada and abroad in medicine, the military, missionary work, and the world of business just to name a few. We at St. Joseph's strive to help you develop the skills today that will enable you to lead tomorrow.
